# Problem Canvas

**Problem Title:**

**Organization:**

**Name of executive:**

| Description | People impacted | Targeted outcome | Type of expertise and resources |
|---|---|---|---|
| [What problem are you trying to solve?] | [Who is affected by the problem? What users are you going to involve in the prototyping and testing phase?] | [How would finding a solution to this problem deliver value and lead to better outcomes for clients and users?] | [What type of expertise or resources the development and implementation of a solution would potentially require?] |

| Potential Partners | Considerations | Data available | Funding available |
|---|---|---|---|
| [Include organizations that should be involved in the development and implementation of a solution] | [Include policy, privacy, accessibility and any other considerations that the solution needs to take into account] | [List type and source of data that could be used to build a potential solution. If none are available, where will you get data or how will you generate them?] | [If funding is available for the development and implementation of a potential solution, specify the source(s) and amount. If no, what could be potential funding sources?] |
